Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Carroll (5462116).

Carroll discloses a method of and device for desorbing methane from a coal formation comprising a mechanical vibrating or sonic device 34 near the coal formation behind casing 4 to desorb methane gas (col. 2, lines 54-67; col. 3, lines 1-11).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Carroll in view of Beard (4537256).

Carroll discloses a method of and device for desorbing methane from a coal formation comprising a mechanical vibrating or sonic device 34 near the coal formation to desorb methane gas (col. 2, lines 54-67; col. 3, lines 1-11) but not two mechanical vibrating means.

Beard presents at least two mechanical vibrating means 1 in a well and taking advantage of the interference (amplification?) effect of multiple vibrations (col. 2, lines 33-40).

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to increase the number of mechanical vibrators, as presented by Beard, in order to increase production (Beard, col. 1, line 4).

Response to Arguments

Applicant's arguments filed 9 December 2005 have been fully considered but they are not persuasive. The examiner contends Carroll discloses casing as part of the well completion (col. 5, line 44) and thus anticipates claim 1.

Conclusion

Applicant's amendment necessitated the new rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3672

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew J. Smith whose telephone number is 571-272-7034. The examiner can normally be reached on T-F, 9-4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Application/Control Number: 10/662,806
